

# HoloDisplay 4K\_28"

3D Led Hologram Advertising Display

4 - arm 28" - 2160p

With micro SD card

Remote control

- Technical data:
- Accepts file formats: mp4, avi, rmvb, mkv, gif, jpg, png
  - Display size: 28"
  - How it works: Remote control / WiFi / Cloud Control
  - Resolution: 2160p
  - FPS (frames per second): 25 F/S
  - Viewing angle: 160°
  - Supply voltage: AC100V-240V, 50/60Hz
  - Brightness: 2200 cd/m2
  - Response time: ± 10 ms
  - Power: 48 W
  - Packaging: Laminated cardboard with foam inside
  - Package contents: 1 x 3D holographic projector, 4 x LED strips, 1 x Remote Control, 1 x 8GB Memory Card, 1 x Mounting Bracket, 1 x Power Cord.

Hologram advertising is the latest technology that attracts everyone's interest. This type of advertising is widely used on the exhibitions of shops, restaurants, clubs, cinemas, airports, hotels and various types of companies that would like to attract attention with their advertising.

The high resolution display supports clear image/photo and video. The rich texture and color strength giving a 3D impression is more attractive than ordinary flat panel displays. Projects and sound are displayed in real time.

You can connect to the device with your phone or computer and you can add sound to make your advertising more attractive.

You can load several advertisements onto a micro SD card and control them with a remote control at the screening location, which is included.

Modern design ensures 24 hours of uninterrupted playback.

The hologram is suitable for outdoor and indoor use. A protective cover, preferably made of plexiglass, should be provided outside.

- IMPORTANT INFORMATION:

  1. To avoid injury, please install the product high, in a position where it cannot be touched by hand, or you can install a protective cover to keep your customers safe.
  2. This product is an electronic product, please pay attention to waterproof.
  3. When disassembling the device, disconnect it from the power supply.
  4. The normal operating temperature of the device is -20-60 degrees. If the ambient temperature is too low or too high, be careful.
  5. Do not use or store the device in high temperature, high pressure, strong magnetic field, heavy dust and humid environment.

Hologram advertising makes the displayed 3D animations visible both with artificial lighting turned on and in daylight. This type of advertising is widely used on the exhibitions of shops, restaurants, clubs, cinemas, airports, hotels and various types of companies that would like to attract attention with their advertising.

The high resolution display supports clear image/photo and video. The rich texture and color strength is more attractive than ordinary flat panel displays. Projects and sound are displayed in real time.

You can connect to the device with your phone or computer and you can add sound to make your advertising more attractive.

You can load several advertisements onto a micro SD card and control them with a remote control at the screening location, which is included.

Modern design ensures 24 hours of uninterrupted playback.

The hologram is suitable for outdoor and indoor use. A protective cover, preferably made of plexiglass, should be provided outside.

5. Do not use or store the device in high temperature, high pressure, strong magnetic field, heavy dust and humid environment.

A collection of icons and images detailing the product's features and components. At the top, a row of icons includes: '4K 2160p' resolution, '24" DIAMETER' display size, 'NIGHT VISION' capability, 'VISION 160°' viewing angle, 'Wi Fi' connectivity, 'SECURITY CONNECTION' lock icon, and 'WATER PROOF' protection. Below these, a large image shows the 24-inch diameter of the display area. To the right, the components are laid out: four black LED strips, four gold-colored screws, a black mounting bracket, a small black remote control, and a black power supply unit with a power cord.

Two images showing the product's packaging and components. The left image shows the closed blue carrying case with 'HoloDisplay 4K\_24"' and '3D HOLOGRAPHIC' printed on it. The right image shows the case open, revealing the internal components: the 3D holographic projector, the mounting bracket, the remote control, and the power supply unit, all neatly arranged.

A wide-angle photograph of a museum gallery. Three white rectangular pedestals are arranged in a row, each displaying a vibrant 3D hologram. The first hologram is a classical Greek-style head of a bearded man with curly hair, surrounded by blue and purple energy waves. The second is a woman's face framed by a circular border of orange and red flowers. The third is a profile of a man's head with red and pink energy waves. To the right, a classical marble statue of a standing figure is visible. The floor is made of light-colored wood, and the walls are white.
